

TRAIL HOUSE

小路宅

TRAIL HOUSE

Sited along a single topographic line, this house is conceived as a series of interlocking pavilions.

Beneath a wooden roof canopy, the internal plan is organized around dispersed storage cores. Each storage core separates and connects the spaces: during the day, every space is living space, while at night every space becomes a quiet space.

小路宅

坐落在一條地形線上，這座房子的構想是一系列相互交織的亭子。

在木屋頂棚下，內部空間圍繞分散的存儲核心構成。每個存儲核心分隔和連接空間：白天，每個空間都是生活空間，而在晚上每個空間成為一個安靜的空間。

PROJECT

Residential structure

SIZE

700 m² (7,535 ft²)

LOCATION

Westchester, NY

KEY PERSON
