

ALLEGHENY MOUNTAIN HOUSE

阿爾及利亞山住宅

ALLEGHENY MOUNTAIN HOUSE

This project re-conceives low-density rural living by dispersing the traditional mountain cabin into a geometric matrix of activities that are optimized for views, solar orientation, wetlands, program, and topography.

Unlike the traditional mountain cabin, with clear separation between inside and outside, here the glass pavilions disperse to separate and connect activities inside and out. A tessellating tile is deployed to separate and connect circulation, while dispersed storage cores and outdoor covered terraces provide the necessary public and private spaces.

阿爾及利亞山住宅

這個項目重新構思低密度農村生活，通過將傳統的山區分散到一個幾何形式的格網上，從而使之之上發生的活動能有優化的景觀、日照、濕地、功能和地形。

不像傳統的山間單元住宅，內部和外部之間有明確的分隔，這裡的散落的玻璃亭子分離或連接內外活動。單元被部署以分離和連接人員流線，而分散的存儲核心和室外覆蓋的露台則提供必要的私人和公共空間。

PROJECT

Private residence

SIZE

400 m² (4,306 ft²)

CLIENT

Confidential

LOCATION

Deep Creek Lake, MD

KEY PERSON

Andrew Heid, Noa Peer, Christopher Purpura
